EDUCATION

Indian Institute of Technology Ropar

Dec 2021 – July 2025

Bachelor of Technology in Metallurgy and Materials Science Engineering

EXPERIENCE

Three Dots

June 2025 - Present

Cofounder

- Delivered **15+ client projects** including high-converting websites, landing pages, and automation systems, helping businesses improve digital presence and generate qualified leads.
- Built and deployed **20+ workflow automations** using **n8n**, APIs, CRM tools, Zapier, and no-code platforms, reducing manual operations by **40%+** and improving team efficiency
- Implemented AI-driven solutions such as chatbots, lead qualification systems, and automated follow-up pipelines, increasing customer response speed by **60%** and boosting conversions.
- Collaborated directly with founders and clients to gather requirements, optimize processes, and launch scalable digital systems that supported **business growth and retention**

CCTech

May 2024 - Aug 2024

Internship, Data Science

- Developed an AI-powered chatbot using LangChain and LlamaIndex, boosting document retrieval efficiency by 25
- Implemented Retrieval-Augmented Generation (RAG) to enhance contextual understanding and enable dynamic knowledge retrieval
- Conducted comprehensive data-driven performance analysis using Python (Pandas, NumPy, Matplotlib, Seaborn) and SQL to refine chatbot query handling
- Collaborated with cross-functional teams to integrate feedback and continuously improve functionality

NeenOpal

June 2024 - Nov 2024

Internship, Product Analyst (Data & Insights)

- Translated business goals into an analytics-driven roadmap; prioritized features that lifted core KPIs by **~20–25%** and reduced ops overhead by **~15%**
- Built GA4/Data Studio dashboards with **SQL** funnels & cohorts; insights improved activation/retention by **~12–18%** and shortened time-to-action by **~3–5 days**
- Ran user research and A/B tests; managed discovery → PRDs → Jira releases → post-launch monitoring, delivering **6–8** iterations with **~30%** faster cycles and **~25–30%** lower TAT

PROJECTS

Zomato Restaurant Insights Tool

Jun 2024

Unsupervised Learning, Sentiment Analysis, PCA

GitHub

- * Applied K-Means, Hierarchical, and GMM clustering for cuisine categorization.
- * Scraped and analyzed 10K+ Zomato reviews with sentiment analysis.
- * Combined PCA and clustering for 90% accurate cuisine recommendations.

StockVision – Real-Time Stock Predictor

Aug 2024

LSTM, Attention, XGBoost, LangChain

GitHub

- * Developed a real-time stock price prediction system using Attention-based LSTM with XGBoost.
- * Incorporated live market data with moving averages and correlation heatmaps.
- * Currently enhancing system with LangChain-powered sentiment analysis.

TECHNICAL SKILLS

–**Programming Languages:** C/C++, Python, SQL

–**Technologies & Tools:** AWS, Scikit-Learn, TensorFlow/Keras, PyTorch, XGBoost, NLP(SpaCy), Computer Vision(OpenCV, YOLO), Recommendation Systems, Tableau, Power BI, Excel

–**Product Skills:** Roadmapping & PRDs; stakeholder management; sprint planning (**Jira, Asana**); support ops (**Freshdesk, Zoho**); analytics (**Google Analytics, Google Data Studio, SQL, Rockmetrics**); experimentation (**A/B testing**); user research & rapid prototyping (**Figma, Sketch, Canva**); clear communication & data-driven decision-making.
